- Help Desk & Issue Resolution
- Vendor Coordination
- Cloud Service Administration
- Upgrade & Migration
- Backup & Cloning
- Disaster Recovery
- User & Role Definition
- Training
- Preventive Health Check

Application Consultancy

Commercial off the shelf applications are preferred by most of the medium and large organizations for automating their business operations.

Though these applications can greatly benefit an organization, implementing them always remains as a challenge as it may drastically change the way the business is conducted.

Replacing the existing legacy systems and re-engineering the business processes of the organization needs an indepth knowledge about the application as well as the industry standard business best practices.

With its vast experience in application consultancy in various domains and regions, ValignIt provides a wide range of services, addressing all the aspects of implementation such as project management, change management, process refinement, customization and integration.

In addition to the above implementation services, Valignit also provides necessary support services to effectivly manage and resolve various functional and technical issues where the application is already implemented.

Application Types

ERP

By aligning the transformation processes with unique business needs, processes, capabilities and a robust organizational structure of our clients, we have successfully rolled out industry leading ERP applications on premise and on cloud.

BUSINESS INTELLIGENCE (BI)

We design and implement powerful business intelligence that allows our customers to plan their business activities, check the performance against that plan, analyze the changes and optimize their process and operations.

INTERNET OF THINGS (IoT)

We have best practices for consulting and deployment services for IoT platform which incorporates performing data analytics, developing IoT applications, associating with IoT devices, integrating with augmented reality and collaborating development environment.

ROBOTIC PROCESS AUTOMATION

We are implementing, consulting and supporting RPA tools for various leading clients. Our experienced Professionals leverage the best-in-class technology and tool to automate the business process of our clients.

Valignit

Single source of end-to-end IT services

About Valignit Technologies

Valignit Technologies is established and run by a group of seasoned technocrats with experience in offering consultancy, development, and implementation services, for regional and global enterprises.
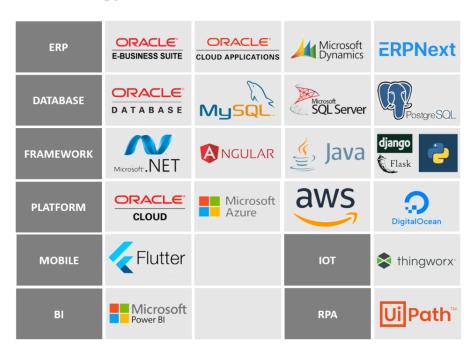

We are leaders in cloud transitions with investments in people, process, and tools to smooth the path for our customers and continue to lead these initiatives with proven methodologies and services.

We will act as a single source for end-to-end solutions and services catering to a broad spectrum of IT requirements ranging from business applications to technical infrastructure and staffing.

Our vast regional experience of seasoned consultants facilitates addressing all localization needs of our local and international customers in the areas of applications, training and deliverables.
