

We align technology to business goal

"The advance of technology is based on making it fit in so that you don't really even notice it, so it's part of everyday life." - Bill Gates

DEVELOPMENT

- Project Planning
- Business Process Assessment
- Blue Printing
- Application Design
- Application Development
- BI & Reporting
- Unit Testing
- System & Integration Testing
- User Documentation

DEPLOYMENT

- On Premise & On Cloud deployment
- Data Migration
- Staging & Production Rollout
- Training

SUPPORT

- Contracted & On Call service
- Help Desk & Issue Resolution
- Enhancement
- Backup & Cloning
- Disaster Recovery
- User & Role Definition

Application Development

The seeded functionality and limited customization capabilities of the off-the-shelf products will not be sufficient enough to fully automate certain non-standard unique processes innovated by the customers.

In such scenarios, custom applications which are tailor made to address such unique processes, will come to the rescue of the customers.

These custom apps will run either as standalone solutions or seamlessly integrated with the already existing legacy applications.

Valignit provides bespoke apps development service that addresses each customer's unique requirements. These custom apps will be developed using proven technology platforms with an affordable pricetag,

These custom apps will be deployed either at the customer's on-premise server or any compatible cloud server as per the need.

In addition to the above development and deployment, Valignit also provides necessary support services to effectively manage and resolve various functional and technical issues.

Application Types

GUI APPS

Intuitively operate through the graphical icons such as buttons, scroll bars, windows, tabs, menus, cursors, mouse pointing device, touchscreen, etc.

CLI APPS

Command Line Interface Applications interact through the terminal and shell. They have no graphics or visual interface.

WEB APPS

Stored on a remote server and delivered over the Internet through a standard web browser.

WEB API

Application Programming Interfaces that provide communication between web sites and client applications

MOBILE APPS

Native mobile app which is built specifically for a mobile device's operating system (OS) such as Android or iOS.

Hybrid mobile app which is actually a web app contained within a Native mobile app thereby behaving like a Native mobile app.

Single source of end-to-end IT services

OFFERINGS

- Application Consultancy
- Application Development
- Managed Database
- Cloud Migration
- Infrastructure Support
- Staff Augmentation

About Valignit Technologies

Valignit Technologies is established and run by a group of seasoned technocrats with experience in offering consultancy, development, and implementation services, for regional and global enterprises.

We are leaders in cloud transitions with investments in people, process, and tools to smooth the path for our customers and continue to lead these initiatives with proven methodologies and services.

We will act as a single source for end-to-end solutions and services catering to a broad spectrum of IT requirements ranging from business applications to technical infrastructure and staffing.

Our vast regional experience of seasoned consultants facilitates addressing all localization needs of our local and international customers in the areas of applications, training and deliverables.
