- Cloning and Patching
- Data clusters, replication, mirroring, and monitoring
- Compliance assurance
- Standard industry testing
- Database schema modeling
- Normalization
- Database upgrades & migration
- SLA based 24x7 monitoring and support
- Onsite and Remote support
- DBA-team augmentation
- Consulting & cost control

## Managed Database

As a result of business process automation, every growing organization maintains volumes of business critical data in their database, which is important for them to serve their customers and for analysis to understand the customer requirement and develop their business.

Deploying fulltime Database Administrators (DBA) with necessary skills to manage these databases may not be cost effective.

Outsourcing Database Management services as a means to reduce IT expenses is a major key decision.

Remote rendering of DBA services results in improved system performance, enabling high efficiency and lower cost of operation.

We help our clients benefit by deploying a team of DBA experts with multi-platform expertise either onsite or remote at a fraction of the cost of hiring full time equivalents with comparable experience locally.

With our tested process and delivery methodology, our database support experts employ their expertise to offer productive as well as reactive database support.

## Benefits

### PRODUCTIVITY

With good data management, your company will be more organized and productive. Employees will have an easier time finding, understanding, and relaying information.

### COST EFFICIENCY

Data management can help your organization avoid unnecessary extra costs such as unneeded duplication. When data is easily accessible, You won't have to worry about employees conducting the same research over and over again.

### OPERATIONAL NIMBLENESS

Great data management makes it easy for companies to respond quickly to the world around them. This means companies can respond efficiently to market changes and react appropriately to competitors.

### SECURITY RISKS

Proper data management helps ensure that your information stays secure and never ends up in the wrong hands. A strong data management system will help protect your information from theft and attacks.

### REDUCED DATA LOSS

With a data management plan in place, you greatly reduce the risk of losing vital company information. It also ensures your important information is backed up and retrievable in case something happens to the original copies.

### ACCURATE DECISIONS

Proper data management helps ensure all employees and workers view and analyze the same, most recent information. This helps ensure that your company will be making the most accurate decisions based on the most accurate information

# Single source of end-to-end IT services

## OFFERINGS

- Application Consultancy
- Application Development
- Managed Database
- Cloud Migration
- Infrastructure Support
- Staff Augmentation

## About Valignit Technologies

Valignit Technologies is established and run by a group of seasoned technocrats with experience in offering consultancy, development, and implementation services, for regional and global enterprises.

We are leaders in cloud transitions with investments in people, process, and tools to smooth the path for our customers and continue to lead these initiatives with proven methodologies and services.

We will act as a single source for end-to-end solutions and services catering to a broad spectrum of IT requirements ranging from business applications to technical infrastructure and staffing.

Our vast regional experience of seasoned consultants facilitates addressing all localization needs of our local and international customers in the areas of applications, training and deliverables.

## Technology

ERP	ORACLE® E-BUSINESS SUITE	ORACLE® CLOUD APPLICATIONS	Microsoft Dynamics	ERPNext
DATABASE	ORACLE® DATABASE	MySQL	Microsoft SQL Server	PostgreSQL
FRAMEWORK	Microsoft .NET	ANGULAR	Java	django, Flask, Python
PLATFORM	ORACLE® CLOUD	Microsoft Azure	aws	DigitalOcean
MOBILE	Flutter		IOT	thingworx
BI	Microsoft Power BI		RPA	UiPath™
