

We align technology to business goal

"The advance of technology is based on making it fit in so that you don't really even notice it, so it's part of everyday life." - Bill Gates

STAFFING

- Vacancy Advertisement
- Candidate Profiling
- Shortlisting Candidates
- Conducting interviews
- Contract Preparation
- Performance Followup

Staff Augmentation

In the IT space, finding qualified talent remains a major challenge for most of the organizations irrespective of their size and nature of business.

Recruitment tasks such as job vacancy advertisements, reviewing job applications, shortlisting candidates, interviewing candidates and negotiating salaries, all take precious time away from the organization's existing obligations, which may end up hurting the business in the long run.

That's where ValignIt can help you by providing qualified and trained resour-

ces ready to be onboarded, reducing the time taken to hire and loss of productivity and thereby saving money and effort.

Engagement models

DIRECT / PERMANENT

Direct hiring is the process of hiring candidates for permanent job roles.

Our recruiters have exceptional skills in recruiting the best candidates for your required skills and technology from the talent pool and social recruiting.

CONTRACT STAFFING

Our Contract Staffing service helps you fill your upcoming short-term or seasonal requirements by hiring contract employees.

Hiring on a contractual basis enables you to maintain appropriate staff levels with retaining the right talent while keeping costs in control.

CONTRACT TO HIRE

An effective strategy for testing a potential applicant's fit. It is the most flexible approach to adding resources without adding the burden of employment processing costs.

Our expert staffing consultants ease the pressure placed on cash flow and headcount while finding the top candidates for your company.

REFERRAL

We refer skilled resources for a marginal hourly referral fee for Contract and Contract-to-Hire roles. It is the most effective process among others and is widely preferred.

Single source of end-to-end IT services

OFFERINGS

- Application Consultancy
- Application Development
- Managed Database
- Cloud Migration
- Infrastructure Support
- Staff Augmentation

About Valignit Technologies

Valignit Technologies is established and run by a group of seasoned technocrats with experience in offering consultancy, development, and implementation services, for regional and global enterprises.

We are leaders in cloud transitions with investments in people, process, and tools to smooth the path for our customers and continue to lead these initiatives with proven methodologies and services.

We will act as a single source for end-to-end solutions and services catering to a broad spectrum of IT requirements ranging from business applications to technical infrastructure and staffing.

Our vast regional experience of seasoned consultants facilitates addressing all localization needs of our local and international customers in the areas of applications, training and deliverables.
