# Solutions & Services

## Our Organization

**VAlignIt Technologies** is an IT advisory and consultancy organization established and run by a group of highly experienced technocrats with more than two decades of experience in Business technology products, Innovative solutions offering, Consultancy and Implementation services for regional and global enterprises.

We offer end to end IT advisory, consultancy and implementation services in key business verticals including Banking, Finance, Insurance, Manufacturing, Distribution, Health, Hospitality, Retail Trading and Investment Banking.

Our services enable business aligned IT solutions that help companies streamline their operations, save costs, gain competitive advantage and be successful.

Our services are driven by our IP a confluence of domain expertise, proven solution frameworks and methodologies, best practices and complementing technologies that are seamlessly aligned to help businesses run legacy and mission critical systems.

### Application Services

We Implement and Support industry leading on-premise and on-cloud ERP, Business Intelligence, Enterprise Content Management (ECM), Robotic Process Automation (RPA) application products. We also develop bespoke applications and custom extensions for the applications as per the client requirement using DevOps or traditional Waterfall models.

### Infrastructure Services

We provide all the facilities and services needed to setup and manage your inhouse and on cloud IT infrastructure. This involves OS software, hardware, operating system, virtualization, communication systems, monitoring systems, standard housekeeping and operational processes, help in setting up technical documentation, repositories and knowledgebase.

### Cloud Services

We offer a wide range of cloud services including Lift and Shift migration of Applications and Databases, Cloud Backup, Security and Identity management, to various industry leading Cloud infrastructure along with performance optimization, license compliance, disaster recovery and periodical maintenance support.

### Staff Augmentation

We provide contract staffing solutions for all technical domains which would help our clients to realize their business goals without any hassles. Since the staffing employees are under our payroll, absolutely no burden towards managing them & cost.

### Managed Database Services

We provide database management service for industry leading on-premise and on-cloud databases ranging from Schema service, DB as a service and Exadata service. Our service cover preventive and periodic maintenance, backup, recovery, patching, upgrades, optimization.

### IT Advisory

With our real-world knowledge and expertise as well as industry best practices we help you address the business challenges using technology thereby achieving strategic clarity, process optimization, organizational readiness, and governance support.

## Our Mission

To provide quality, timely IT solutions and services that are aligned to business objectives and are cost-effective to propel successful business transformation.

## Our Vision

To be the most preferred IT solutions partner in transforming businesses by means of providing agile IT solutions and services.

## Our Strength

Leaders in cloud transitions with investments in people, process, and tools to smooth the path for our customers and continue to lead these initiatives with proven methodologies, precise architectural design services, and independence on technology choices.

Combined experience of over 150 years in IT consulting, solutions and technologies serving regional and global markets.

Single source for end-to-end solutions and services catering to a broad spectrum of IT requirements ranging from business applications to technical infrastructure and staffing.

Vast regional experience of seasoned consultants addressing all localization needs in applications, training and deliverables.

Cloud Infrastructure	ORACLE® CLOUD INFRASTRUCTURE	Microsoft Azure	amazon web services
Development Platform	Java	python™	Microsoft .NET Framework

## Cloud Migration Trend

Over the past decade, cloud computing adoption is on rising owing to increasing investments from small and medium enterprises. Globally, many organizations already tapped into the power of the cloud to take advantage of the benefits.

The major reasons for migrating to the cloud are scalability, increased effectiveness, faster implementation, mobility, and disaster recovery, among others. Major companies are offering cloud disaster recovery feature to their customers, aiding them to expand their businesses.

Cloud migration is also gaining popularity for its real-time experience, business elements, and accessibility to the on-premise data. This technology also aids to set up and work based on several units in minimal time.

Furthermore, the migration of data is easy to store and access at a low cost, and it enhances its productivity or efficiency.

## Our Team

We are a team of Growth-Centric IT Executives with 25+ years of experience in leadership, software development, business development, IT operations, infrastructure management, key partnership development, risk management, and business continuity planning.

We are highly experienced in operational improvements to drive productivity and reduce costs. Excel in dynamic, demanding environment and maintaining strong focus on client imperatives.

Our team has handled large datacenter transformation programs and license optimization drives for large to SMB customers across Middle East and India.

We are majorly working on ERP applications, Database, Middleware, Security products, Oracle Public Cloud, AWS, Azure.
